This memo is to inform you that the compounds listed below were not able to be validated by USDA's Pesticide Data Program (PDP) and were not analyzed in canned pineapple during the timeframe of January 2017 through December 2017. These compounds have established U.S. tolerances for pineapple but did not recover through the QuEChERS Multiresidue Method (MRM) employed by the Florida Department of Agriculture and Consumer Services laboratory, which was one of two PDP laboratories assigned to test canned pineapple for PDP during this time period.
